

Man Yue Announces New Green “nano Force” EDLC Products

Man Yue is pleased to announce a new product family, the “**nano Force**” brand of Electric Double Layer Capacitor (EDLC), commonly known as a supercapacitor or ultracapacitor. Currently, we supply three main kinds of radial EDLC products with a voltage range from 2.5V to 5.0V and a capacitances range from 0.22F to 100F.

The “**nano Force**” is highly effective as a rechargeable battery and is ideal for energy back-up. It has a high durability and can be recharged hundreds of thousands of times. Higher durability also means less waste disposal. The “**nano Force**” products is our next generation “Green Energy” storage device as it does not contain toxic materials such as lead, nickel and cadmium but is composed of environmentally friendly active carbon and an organic solvent. Therefore, it is the perfect fit for applications in solar energy systems, electric bikes and other electric-powered vehicles.

All “nano Force” branded products are in compliance with the European Union RoHS Directive (2002/95/EC). Samples and orders for production with quantities are available now.
